**DETAILED ACTION**

1. Claims 1-26 are pending in this office action.

***Allowable Subject Matter***

2. Claims 1-26 are allowed.
3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach an arrangement where a user entity receives a confirmation of the validity of a program that was downloaded from a software provider by:
  - a. The user encrypting data that comprises public data of a third party and portions of the program,
  - b. Sending the data to the software provided,
  - c. The software provider being unable to decrypt the data until,
    - i. The encrypted data is sent to the third party,
    - ii. The encrypted data is decrypted by the private data of the third party,
    - iii. A decryption key is created by the third party and sent to the software provide,
  - d. The software provider decrypting the encrypted software, and
  - e. The software provider providing a validation that the user software is valid.

This process enables a software provider to validate a program, but without the ability to alter the true validity of the program by modifying the program to make the program appear valid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent No. 6,330,549 (Merkle), US Patent No. 5,982,892 (Hicks et al.), and US Patent No. 5,490,216 (Richardson, III), disclose software validation systems.
